

# TS-3

Bellows type

The TS-3 radiator trap, same as TS-1, is bellows thermostatic type and supports a working pressure of up to 0.2MPa. It is used for a wide variety of heating equipment.

## ■Features

1. Compact, lightweight and reduced noise.
2. Prevents freezing damage since designed not to allow condensate to remain inside.
3. Quickly discharges cold condensate and air at the start of operation.
4. The valve and valve seat are made of stainless steel. Fluororesin is used for the cover gasket, making disassembly and assembly easy.
